

TEST CASE ANSWER SHEET

For the tester only - do not upload with case documents

UPLOAD INSTRUCTIONS

Upload Case 01 first. Use one combined six-page PDF per case. Keep automatic document detection ON and formatting mismatches OFF. Alternatively upload the six individual PDFs together, never both versions. Create a separate case for Case 02. AI analysis consumes shared OpenRouter credits.

CASE 01 - MATCHING CASE

PO SG/PO/26-27/101 | Invoice ARM/26-27/101
Taxable INR 620,000.00 + GST INR 111,600.00 = INR 731,600.00.
10,000 KG; vehicle MH12AB4821; weighment 24,000 - 14,000 = 10,000 KG.
Expected: one case, six documents, no substantive mismatches; then manual case acceptance.

CASE 02 - DELIBERATE DISCREPANCIES

CHECK	REFERENCE	CONFLICT
Amount	Invoice: INR 731,600.00	E-way bill: INR 767,000.00 (INR 35,400.00 higher)
Vehicle	Invoice / e-way / weighment / delivery: MH14EF6724	Lorry receipt: MH20CD7823
Net weight	Lorry receipt / consignment: 12,000 KG	Weighment: 11,700 KG (300 KG short)

The amount discrepancy may create three cards: taxable value, tax, and total. Check that unresolved issues block acceptance. On this disposable test, reject an issue, refresh, then change decisions to test persistence and final acceptance. Do not approve incorrect real records merely to clear a queue.

WHAT HAS AND HAS NOT BEEN VERIFIED

PDF and reference-field checks are local. Live Gemini extraction and terms review have not been run and may yield additional findings. Investigate differences against the original pages. All documents are fictional; no cloud upload or paid AI request was made during preparation. See READ-ME-FIRST.md for full details.
